

## GEOADVICE GROWS ITS STORMWATER PRACTICE!

GeoAdvice Engineering Inc. is pleased to announce the addition of Julien Bell, Stormwater Specialist, to the Port Moody, BC team. Julien is joining the GeoAdvice team to manage its growing number of stormwater projects.

Julien has experience in the field of integrated water resource management, watershed and urban stormwater management, system capacity review and master planning. Since graduating from the University of Waterloo in 2008 with a Bachelor of Applied Science, Julien has participated in a number of challenging hydraulic and hydrology projects delivering innovative analytical solutions to clients. Some of Julien's more challenging projects have included the forensic investigation of major floods, and the long-term watershed modeling that incorporated the snow cycle (freshet modeling).

Julien has gained valuable experience at Urban Systems Ltd. where he has worked for three years. He is now excited to grow GeoAdvice's stormwater practice and be part of GeoAdvice's dynamic team.

For leisure, Julien enjoys curling, hiking, kayaking and is a literature and boardgame aficionado. Julien just got married and has just returned from his honeymoon in the Dominican Republic. **Congratulations and welcome to the team Julien!**

*"It's my goal to become an industry leader in hydraulic and hydrologic modeling and analysis by delivering innovative and practical solutions to meet our clients' needs. GeoAdvice's expertise and corporate vision will help me achieve that objective!"*

*Julien*

**GeoAdvice** is the *only* company in North America offering advanced hydraulic and hydrologic modeling services, training and tools for water, wastewater, and stormwater systems.

**Before you waste another cent on modeling that does not work read this...**
